

Voyage Plan Project

Step 2 (Preliminary Tasks)

Below are the Voyage Instructions. Identify the ports and berths, check all Safe Port Considerations, and conduct a quick Distance Appraisal. DO NOT CREATE YOUR ENTIRE VOYAGE PLAN. This is just to obtain rough distances for a speed and eta calculation.

Once you have completed these tasks, you will put them in a clean spreadsheet so that the information is easily understood. (the book has a few good examples of how this can be done)

Subject: American Mariner: Initial Voyage Instructions - Schuyler Bulker Carriers CPDD 12 Dec 2018

Dear Captain,

Good Day. The next employment for vessel Voy23 will be taking a cargo of barley from New York to Algeciras. We will have full instructions for you shortly.

Upon completion discharging salt at berth 7 in Brooklyn, NY for Voy22 and once harbor pilot is aboard, pls proceed to the berth 58 in Port Elizabeth, NJ to load barley.

Agreed quantity of bagged barley in the CP is for 10,000 tons. Average stowfactor of bagged barley is 62.7 cu.ft./ton.

Agents for the load will be Oldship Inc in New Jersey. Please contact them soonest to advise eta and commence pre-arrival formalities.

Best Regards,

Jim Chartermaster
