Voyage Plan Project

Step 4 (ECDIS Pre-Setting)

- Determine several emergency shelters (one on US Coast and one halfway across Atlantic Ocean).
- Use this Chart Catalog planner to identify all the required ENCs which we will need to purchase (This is a NOAA chart catalog so it will only be for the US charts). https://www.charts.noaa.gov/InteractiveCatalog/nrnc.shtml#mapTabs-2
- Check NAVTEX warnings. Look for any information which may be relevant to our voyage. Highlight this information so that it can be added to our ECDIS Charts
  o http://www.navtex.lv/navtex/MainTable
  o To make it more manageable, be sure to select the correct area number

    ▪ Navarea 1 – North Atlantic, North Sea, Baltic Sea.
    ▪ Navarea 2 – East Atlantic.
    ▪ Navarea 3 – Mediterranean Sea.
    ▪ Navarea 4 – West Atlantic.
    ▪ Navarea 5 – Brasil.
    ▪ Navarea 6 – Argentina, Uruguay.
    ▪ Navarea 7 – South Africa.

- Identify values to be entered into the ECDIS:
  o Safety Contour
  o Safety Depth
  o Shallow Contour
  o Deep Contour

Use a USB (Provided by instructor) to save your progress on the ECDIS. We will be editing this next time. Give the USB back to the instructor to ensure it is only used in the simulator in order to lower probability of exposing the simulator to a virus.
